opening **sunday 4 february** 16.00 - 18.00 hrs

exhibition runs until 4 march 2018

The exhibition Earthquakes in Bradwolff Projects presents the eponymous video installation by Maya Watanabe from 2016-2017. Two videos record sudden and disruptive events that take place in an empty theatre in Japan. One video shows the scenario at macro level, the other at micro level. Against the background of a mysterious and ominous soundscape, the storyline unfolds around an aquarium and a seemingly ordinary planter.
